SUMMARY

Full-stack developer focused on building real-time and scalable web applications using the MERN stack. Experienced in authentication, REST APIs, and responsive UI development with strong interest in backend architecture and real-world problem solving.

EDUCATION

Graphic Era Hill University

B.Tech in Computer Science

CGPA: 7.35

BAPS Swaminarayan Vidya Mandir

Class 12 CBSE

Percentage: 73.6%

Our Lady Of Help English School

Class 10 CBSE

Percentage: 79.6%

PROJECTS

Hospital Management System | *React, Express.js, MongoDB, Zustand, Tailwind CSS, JWT*

2025 – Present

- Architected role-based access control system for admin, doctor, and patient workflows
- Built secure authentication system using JWT with protected routes and user authorization
- Developed modular backend services for managing appointments, users, and records
- Created responsive UI with efficient state management using Zustand
- Live: hospital-management-aqxt.onrender.com

Real-Time Chat Application | *React, Node.js, Express.js, MongoDB, Socket.io, JWT*

2025

- Enabled real-time messaging for 10+ concurrent users using WebSockets with Socket.io
- Implemented cookie-based JWT authentication for persistent user sessions
- Built live user presence tracking with online/offline indicators and dynamic filtering
- Optimized message flow for low-latency communication between users
- Live: chat-app-x2ae.onrender.com

TECHNICAL SKILLS

Languages: JavaScript

Frontend: React, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js

Database: MongoDB

Concepts: REST APIs, JWT Authentication, WebSockets

Tools: Git, GitHub, Postman, Docker, Nginx, Render

CERTIFICATIONS

MERN Stack Project for Beginners – Udemy ([Certificate](#))

STRENGTHS

Problem Solving | Quick Learner | Curious Mindset
